

# CANADA ARCTRIUM CORP

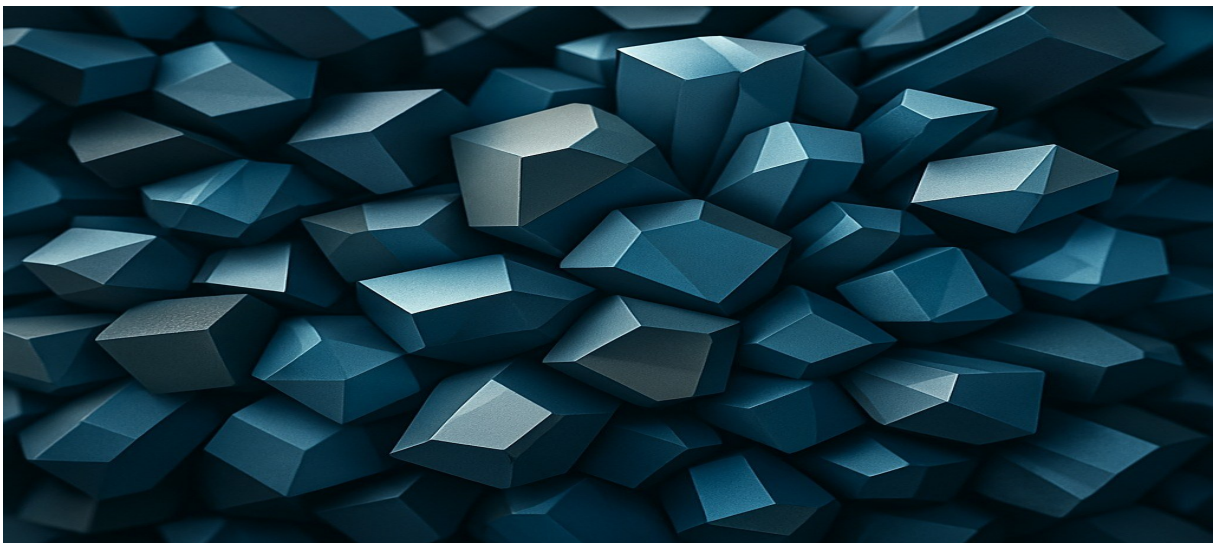

*Corporate Profile • 2025*

## Executive Summary

Canada Arctrium Corp is a Canadian export-focused company specializing in critical minerals and rare earth feedstock, including NdPr-bearing materials. Our mission is to position Canadian suppliers as reliable, transparent, ESG■aligned partners to global advanced manufacturing and refining industries.

## Company Background

We serve as a commercial bridge between Canadian suppliers, junior mining projects, and verified international buyers. We create realistic export pathways supported by accredited

assays, compliant documentation, and professional logistics coordination.

## Core Services

- Supplier engagement and opportunity framing
- Buyer qualification and fit assessment
- Accredited assay coordination
- Documentation management (COA, MSDS, origin, logistics)
- CIF / FOB / EXW logistics support
- Market development for Canadian-origin feedstock

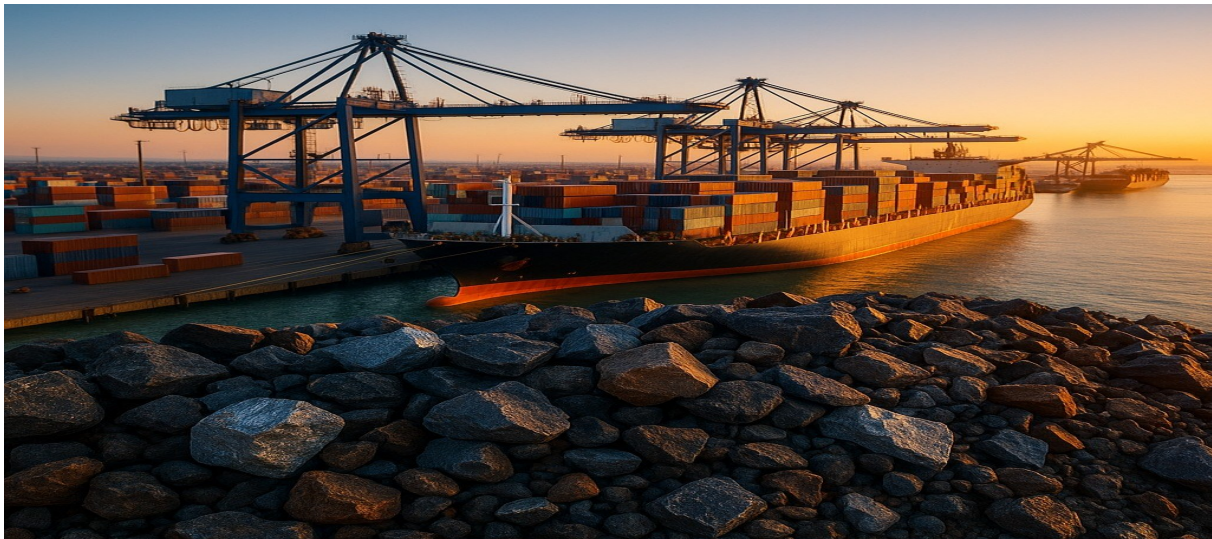

## Markets We Serve

We support buyers in Asia, Europe, and North America across permanent magnets, EV motors, clean energy, alloys, and refining industries.

## Competitive Advantages

- Transparent Canadian-origin supply
- Documentation-first operations
- Accredited assay verification

- Strong export logistics channels
- Support for early-stage suppliers
- Relationship-focused export model

## ESG & Compliance Commitment

Our operations reflect Canadian ESG expectations, emphasizing environmental responsibility, community respect, and transparent trade practices.

## Frequently Asked Questions

- Do you guarantee buyers? — No.
- Can early-stage suppliers export? — Yes, if data supports it.
- What volumes are possible? — Case-by-case.
- Assay support? — Yes, via accredited labs.
